

Dear Mr. Green (D-TX)

Please tell me you do not support the National Association of Broadcasters (NAB) in their pursuit of stopping XM satellite radio from providing Instant Traffic & Weather. I cannot believe that you would even entertain the idea of limiting information provided by a service like (XM Satellite Radio), that I choose to spend my hard earned money on. By the way, as a consumer and a tax payer we provide you the means of even having a job so please stay focused on real issues like education and the economy. I oppose HR 4026, so as my representative you need to protect my rights.

Sincerely,  
Rafael Franco
